Architectenbureau Dries
BONAMIE

Hotel des Brasseurs has received the CO2 Neutral Company label from CO2 Logic and AIB Vinçotte.

They strive for sustainability in every aspect, such as water reuse, geothermal heating and cooling, charging stations for electric vehicles, and sorted waste management.

The hotel also offers facilities and a good working environment for staff.

BM Engineering was responsible for the design of the CO2 neutrality. This label applies specifically to the operation of the hotel and focuses on infrastructure emissions, company cars, waste, commuting, and incoming materials.
